THE COMPANY

Larsen & Toubro (L&T) is a US$ 14 billion technology, engineering, construction and manufacturing company. Recognized by Forbes as one of the Most Innovative companies in the world, L&T is also ranked 4th in the global list of Green Companies in the industrial sector by the Newsweek magazine. A strong customer-focused approach coupled with strict adherence to global HSE standards and a constant quest for top-class quality have enabled L&T sustain leadership in the business sectors it operates in for over 75 years.

L&T Construction is the construction arm of L&T. Ranked 28th among the top 225 global contractors by Engineering News Record in 2013, L&T Construction is India’s largest construction organization offering EPC solutions with single-source responsibility for executing large industrial and infrastructure projects from concept to commissioning, with a pedigree of over 70 years. L&T Construction has proven its capability for executing all types of mega projects on a turnkey basis involving innovative designs, comprehensive construction services that include procurement, supply, installation, testing and commissioning.

HEALTH & LEISURE BUSINESS UNIT (H&L BU)

The H&L BU is an integral part of a business vertical within L&T Construction named ‘Buildings & Factories’ that is equipped with the domain knowledge, requisite expertise and wide ranging experience to undertake Engineering Procurement Construction (EPC) projects for all types of building and factory structures. These EPC solutions are offered with single-source responsibility, from concept to commissioning.

The HEALTH SEGMENT of H&L BU undertakes the construction of hospital projects including planning, design, procurement, installation and commissioning of medical equipment.

Some feature highlights:

• Capability of executing projects of large magnitude on turnkey basis, involving innovative design & comprehensive construction services
• Well-structured quality assurance systems ensuring quality, safety & reliability
• State-of-the-art design and mechanized construction methods and strategic alliances that have helped the company set new standards - both domestically and Internationally
• Leading edge capabilities to cover every discipline of construction: Architecture, Structural, Mechanical, Electrical and Instrumentation

Healthcare facilities in India have witnessed dramatic advancement with the introduction of sophisticated medical equipment and technology coupled with a pragmatic approach, increased Inter-relationships of various functions and significant circulation patterns. Future expansion plans and modernization of facilities need careful integration with the hospital design. In this new, emerging scenario, the Hospital has to be designed in a way that it is holistic, is patient friendly and has a healing environment.

L&T Construction is a leader in the construction of healthcare projects that are vital for the growth of any nation. The Company has designed and built Corporate hospitals, Government hospitals, Teaching hospitals, Super Speciality hospitals, Medical Colleges & Nursing Colleges apart from other supporting infrastructure like housing and hostels for doctors, nurses and students. A specialty of L&T is the integrated solutions that are on offer beyond the traditional construction services. L&T’s comprehensive services include design solutions, strategic sourcing of medical equipment and commissioning in addition to specialized services in the areas of building management services, earthquake resistant buildings, horticulture and landscaping. Over the years, more than 18000 hospital beds have been added and 35 million sq.ft built up area dedicated to the healthcare infrastructure across the globe.
